

Discussion questions for HSS Breakout Session. June 21 15:15 – 16:45

HIS

- What do you think causes discrepancies between site and provincial data when it is aggregated?
- How would you select sites for installation or expansion of HIS?
- What are the benefits or problems with the existing electronic HIS? Are there specific systems that work well?
- What has been your experience with SESP? Does it help in planning HIV activities?

HRH

- How does your province track the deployment of peer educators, community health workers, and other auxiliary staff? How do you standardize the approach across partners?
- How do you determine training needs and select people for in-service training?
- How do you calculate HRH need and gaps to inform deployment of new staff?

Supply Chain

- How are IPs support DPS in supply chain to the district and US levels? Is this system successful? Why or why not? Are there areas of gaps or overlaps?
- Do you feel that the provincial and district level systems for monitoring stock and responding to stockouts is effective? How would you improve it?
